

## ALTERNATIVE AND COMPLEMENTARY CANCER TREATMENT

Just hearing the word cancer can be a frightening experience. When you are fighting your battle against cancer, you want people on your side who are knowledgeable, practical and proactive who also taking into account the whole person. There are many people out there with alleged cures for cancer and far-reaching promises, most of which are untrue. Many of these approaches are ineffective and may even be dangerous. We can help you find your way through the woods. There are many wonderful therapies that are designed to help you fight your cancer. Let us help you find the ones that are best for you.

We treat any stage or type of cancer

Our treatment is tailored to you

- and the specific type, stage and presentation of your cancer

We do testing to assess heavy metal toxicity and immune system status

We take the time to get to know *you*, not just your cancer

1 \_ hour initial visit

We are happy to talk to and work with your oncologist

Visits may be covered by your insurance, please ask

### **We use research-based natural therapies to**

- actively fight cancer
- prevent the development of cancer in people at high risk
- prevent recurrence after successful cancer treatment
- increase the effectiveness and decrease the side-effects of chemotherapy
- increase the effectiveness and decrease the side-effects of radiation therapy
- decrease the risk of metastatic spread during biopsy or surgery
- speed recovery from surgery
- detoxify heavy metals and solvents that are associated with cancer development
- enhance the cancer-fighting parts of the immune system

### **Your personalized anti-cancer program will include some or all of the following:**

- Iscador (Mistletoe) Therapy
- Specific Anti-cancer Diet Guidelines
- Vitamins and minerals
- Oral enzymes
- Anti-cancer Herbs and medicinal mushrooms
- IV Vitamin C
- Counseling
- Far-infrared Sauna treatments
- Art Therapy

We'll also tell you what foods and vitamins you need to *avoid* when you have cancer!

## **Testimonials from Dr. Barker's patients:**

When I first came to Paracelsus two and a half years ago, I was a wreck. I had just had a lumpectomy and was told that I needed chemotherapy because the cancer had gotten into my lymph nodes. I knew I didn't want chemo, so I had researched alternative cancer therapies, but was confused by all the information out there. I had also seen a number of other medical practitioners who had given me conflicting and in some cases clearly wrong information. Once I met with Dr. Barker, I knew I had come to the right place. We ran tests that showed that my immune system was in terrible shape and that I had high levels of metal toxicity. Dr. Barker put me on a comprehensive program, including Iscador injections, antioxidants, a full range of supplements, a cleanse to extract the toxic metals, and a healthy diet that would not give any remaining cancer cells the opportunity to build tumors.

Although my oncologist and surgeon predicted that without chemotherapy the cancer would return within a year or two, it's now been two and a half years, and I'm in better health than ever before. A repetition of the tests showed a dramatic reduction in toxic metals and a vast improvement in my immune response.

For a couple of decades before coming to Paracelsus, I had seen doctors in different areas of medical practice. They ranged from people who were only interested in selling me their favorite supplements to those who were just plain greedy, uncaring and incompetent. You won't find any of that at Paracelsus. Dr. Barker is a kind, caring, trustworthy and extremely knowledgeable individual whose only agenda is to make you healthy and keep you that way. - A.S., Canyon Country

Dr. Barker, what a blessing to have found you! Receiving a diagnosis of breast cancer in 2004 and being thrown into the fear-based conventional medicine health care system was traumatic to say the least. The conventional doctors insisted that I should undergo a program of full chemotherapy and hormone therapy along with other chemotherapeutic treatments. They stated that if I didn't, I would be facing a fatal outcome. Under your guidance and unwavering support, I was given alternative treatment options that gave me the courage and faith to treat breast cancer with alternative natural medicine. I am an athlete, writer and a vegetarian and the program that you designed for me aligned with my physical, spiritual and philosophical needs and belief system. Prior to treatment, you provided me with research information that empowered me to make my own decision about my treatment and provided my family with the peace of mind that they needed to know that my decision was a sound one.

You are a true healer and a good friend and I am eternally grateful to you for the life that I now have---one of vital health, vigor and optimism for my future. - L.Z., Malibu
