

## **Pediatric Care**

We use safe and effective, non-invasive, natural treatments to keep your child healthy. We recommend changes in diet, sleep and other daily habits and prescribe homeopathic remedies, herbs, vitamins, and therapeutic baths and wraps. We take time to explain both the diagnosis and the treatment we are suggesting.

We treat all childhood illnesses without antibiotics or other drugs, if possible. However, we are willing and able to prescribe conventional medications if it is necessary.

We are happy to work with parents who do not wish to vaccinate their children. Individual and thimerosal-free vaccines are available upon request.

We are an open and affirming practice and support gay and lesbian parents.

Visits may be covered by your insurance. Please ask our staff for details.  
Call for your FREE 15 minute consultation or to set up a visit: **626 794 4668**

**And we provide medical care and coordinate support for children with:**

- ADD/ADHD
- Anger & Behavioral Issues
- Poor School Performance
- Autism
- Asperger Syndrome
- Down Syndrome

**Testimonials from our patients:**

Finding the right Pediatrician for my child was one of my biggest concerns. After interviewing many pediatricians, I chose Dr. Brousseau and Dr. Barker's office, because they have a real concern about the whole person. I sensed their deep caring for their patients.

This was one of the best choices I have made for my child. The care is the kind you hear about only in a good old fairy tale. The knowledge and experience they possess is outstanding. Their alternative way of treating babies and children is remarkable. I know that my child will not receive a "standard" medicated treatment.

As a new mother, I am concerned about everything. But no matter how little the problem is, they are always patient and understanding and I leave the office or the phone knowing that my child is alright and will get better. The visits take at least 25-30 minutes and the doctors are very thorough. Every time there is a problem and I have to call the doctor, I receive a return call within 5-15 minutes 24/7 and they are with me on the phone until they know the situation is under control and there is no threat to my child. I have the peace in my mind that my baby is getting outstanding medical care.

K. G., Eagle Rock
